

## 1. User Management

- Separate registration & profiles for:
- Transport Owners (vehicle details, capacity, routes, pricing).
- Goods Managers (shipment details, timelines, destinations).
- Role-based authentication & secure login.

## 2. Shipment Posting & Matching

- Goods managers can post shipment requirements (weight, type, pickup/delivery location).
- Transport owners list available vehicles & schedules.
- Matching algorithm to connect shipments with suitable transport.

## 3. Booking & Scheduling

- Real-time booking system.
- Calendar integration for transport owners.
- Option for instant booking or bidding/negotiation.

## 4. Tracking & Visibility

- GPS integration for live tracking.
- Status updates: pickup, in transit, delivered.
- Notifications via SMS/email/app.

## 5. Payments & Contracts

- Secure payment gateway (Stripe, Razorpay, PayPal).
- Commission model for the platform.
- Digital contracts & invoices.

## 6. Communication

- In-app chat or call feature between goods managers & transport owners.
- Automated notifications & reminders.
